

Colorado Victim Resources Product Functionality Guide

Version: June 11, 2026

This guide explains the functionality available in the Colorado Victim Resources application. It covers the public resource site, the admin portal, and the secure admin message board.

1. Product Overview

Colorado Victim Resources is a web application for finding, organizing, sharing, and maintaining victim-support resources. The product has two main experiences:

- Public site: used by community members, victims, advocates, and staff to find resources, share brochures, contact victim services, and adjust accessibility settings.
- Admin portal: used by approved administrators to manage brochures, categories, volunteer advocate resources, tutorials, admin invites, activity, help content, and internal team messages.

The application is backed by Supabase for authentication, database storage, file storage, Edge Functions, and row-level security.

2. Public Site Functionality

2.1 Home Page

The home page introduces the resource library and provides the fastest path to finding help.

Key functionality:

- Search resources from the main page.
- Browse resource categories.
- Open featured resources.
- Navigate to Resources, Contact, Help, or Admin from the hamburger menu.
- Use Quick exit to leave the site quickly.
- Adjust text size from the header.
- Change language from the menu.

2.2 Resource Search

Users can search resources by title, description, and tags.

Search is available in:

- The home page search box.
- The Resources page search box.
- The hamburger menu as the first available menu function.

When a search is submitted, the app routes the user to the Resources page and displays matching brochures.

2.3 Resources Page

The Resources page shows the full brochure library.

Users can:

- Filter resources by category.
- Search the full library.
- View brochure cards.
- Select up to five resources for grouped sharing.
- Clear filters when no results are found.

2.4 Sharing Resources

Resource sharing allows users to send or copy resource information.

Supported flows include:

- Share a single brochure from a brochure card.
- Select up to five brochures and share them together.
- Send by email when configured through the Supabase Edge Function.
- Open or copy messages for alternate sharing workflows.

Privacy guidance:

- Do not include private victim information in resource notes or messages.
- Use approved anonymous workflows when texting resources.
- Avoid sending from a personal phone number when anonymity is required.

2.5 Contact Page

The Contact page provides key service and rights information.

It includes:

- After-hours contact number.
- Office phone number.
- Victim Services email.
- Colorado Victim Rights information.
- Privacy and safety guidance.

The site is not an emergency reporting tool. For immediate danger, call 911.

2.6 Help Page

The public Help page explains how to use the public side of the product.

It covers:

- Finding resources.
- Sharing resources.
- Safety and accessibility features.
- Contact information.
- Emergency-use limitations.

2.7 Public Hamburger Menu

The public menu is designed to be accessible and mobile-friendly.

It includes:

- Resource search as the first item.
- Home.
- Resources.

- Contact.
- Help.
- Quick exit.
- Language selector.
- Admin portal link.

The menu uses a drawer pattern similar to the admin portal so both experiences feel related.

2.8 Accessibility Features

Accessibility features include:

- Skip-to-content link.
- Keyboard-visible focus states.
- Text size control.
- Mobile-friendly drawer navigation.
- Clear labels on controls.
- Language selector.
- High-contrast emergency banner.

3. Admin Portal Functionality

3.1 Admin Authentication

The admin portal is available only to approved admin users.

Admin access supports:

- Email/password login.
- Password reset.
- Invite-based registration.
- Super admin approval and invite controls.
- Role-based permissions.

Admin roles:

- Admin: can manage resources and use internal admin tools.
- Super admin: can manage invites, admin users, and higher-risk administrative actions.

3.2 Admin Dashboard

The dashboard gives administrators a quick operational snapshot.

It shows:

- Total brochures.
- Featured resources.
- Categories.
- Share events.
- Recent uploads.

Admins can quickly edit or share recently uploaded brochures from this area.

3.3 Brochure Management

Admins can manage the public brochure library.

Supported actions:

- Add a brochure.
- Upload a document.
- Edit title, description, category, tags, and metadata.
- Feature or unfeature a brochure.
- Share a brochure.
- Move a brochure to Trash.
- Restore from Trash.
- Permanently delete from Trash.

Files are stored through Supabase Storage.

3.4 Category Management

Categories organize resources for browsing and filtering.

Admins can:

- Add categories.
- Edit category labels.
- Set short symbols.
- Pick category colors.
- Delete categories when no brochures are using them.

3.5 Tutorial

The Tutorial section is an admin-facing checklist for onboarding and repeatable workflows.

Admins can:

- Complete checklist items.
- Hide completed items.
- Reset tutorial progress.
- Add, edit, or remove tutorial steps in edit mode.

Super admins can reset tutorial progress for other admin users.

3.6 Volunteer Advocate Resources / Field Guide

Volunteer Advocate Resources is a searchable field guide for advocate workflows.

It supports:

- Table-of-contents sections.
- Submenus for sections with multiple entries.
- Search across section, title, body, and tags.
- Mobile-friendly reading.
- Admin editing.
- Add, edit, delete, publish, tag, and sort entries.

Example field guide content includes:

- Taking the call.
- Arriving on scene or calling by phone.
- Crisis intervention.
- Ending a call.
- Conversation starters.
- Victim advocate creed.

3.7 Share Activity

The Activity section shows recent sharing events.

It includes:

- Brochure title.
- Share method.
- Share timestamp.

This helps admins understand resource usage without storing private victim information.

3.8 Admin Invites and User Management

Super admins can manage admin access.

Supported functionality:

- Send admin invite links.
- Choose admin or super admin role.
- Automatically email invite links when email configuration is working.
- Copy invite links.
- View active admin profiles.
- Delete admin access.
- View invite attempt logs.
- Verify that invite registration email matches the invited email exactly.

The invite attempt log records:

- Entered email.
- Invite email.
- Match status.
- Timestamp.

3.9 Admin Help

The Admin Help page explains the admin portal and the public site from an operational perspective.

It covers:

- Dashboard.
- Tutorial.
- Volunteer advocate resources.
- Brochure and category management.
- Invites and admins.
- Activity.
- Message board.

3.10 Admin Message Board

The Message Board is a secure admin-only communication space.

Admins can:

- Read team messages.
- Post a message.
- Refresh messages.
- Pin their own messages.

- Delete their own messages.

Super admins can:

- Pin any message.
- Delete any message.

Security and privacy rules:

- Only approved authenticated admins can read or create messages.
- Messages are protected by Supabase row-level security.
- Do not post victim names, phone numbers, addresses, case numbers, or case facts.
- Use the board for operational updates, shift notes, resource reminders, and admin announcements.

4. Security Model

The application uses Supabase Auth and row-level security.

Key protections:

- Admin-only tables require an approved admin profile.
- Super-admin functions are restricted by role.
- Admin invites are token-based and email-matched.
- Message board access is restricted to approved admins.
- Public users cannot access admin tables directly.

5. Supabase Functions and Data

Supabase is used for:

- Authentication.
- Admin profile and invite management.
- Brochure records.
- Category records.
- Share logs.
- Tutorial steps and completions.
- Field guide entries.
- Admin message board.
- File storage for brochure documents.
- Email and invite Edge Functions.

Important Edge Functions:

- send-email: sends resource email messages.
- send-invite: sends admin invite emails.

6. Recommended Operating Practices

For public-side use:

- Search first when the user knows what they need.
- Browse categories when the user is unsure.
- Use Quick exit when privacy or safety is a concern.
- Call 911 for emergencies.

For admin-side use:

- Keep brochure titles clear and searchable.
- Use tags consistently.
- Avoid storing private victim details.
- Keep field guide entries short and mobile-friendly.
- Use the message board for admin operations only.
- Review invite attempts if a user reports registration issues.

7. Feature Checklist

Public site:

- Home page.
- Search.
- Resources page.
- Category filtering.
- Resource cards.
- Multi-resource sharing.
- Contact page.
- Help page.
- Quick exit.
- Text size controls.
- Language selector.
- Mobile hamburger drawer.

Admin portal:

- Login.
- Password reset.
- Invite registration.
- Dashboard.
- Brochure management.
- Trash and restore.
- Category management.
- Tutorial checklist.
- Volunteer advocate field guide.
- Share activity.
- Admin invite management.
- Admin user deletion.
- Admin help page.
- Secure admin message board.

8. Change Notes

Recent additions covered by this guide:

- Public and admin Help pages.
- Shared product guide content.
- Secure admin Message Board.
- Supabase admin_messages table and row-level security policies.
- Message board integration test coverage.
